

MEDICAL REHAB TESTIMONIALS

Letters of recognition from patients at Texas NeuroRehab Center and their families.

The longevity of staff was impressive. Several have been there 30 years or more.

We want to express our sincerest gratitude to both the inpatient and outpatient therapists who worked so diligently with me and believed in me.

We would like to express our sincerest appreciation for this finely run facility. The care exceeded my expectations.

Throughout our stay, Dr. Boyson and his staff went above and beyond to ensure the best for my dad.

Doctors, nurses, techs, physical and occupational therapists, dietary and environmental - they desire the best outcome for all patients.

The occupational staff contributed so much to my recovery. The physical therapy staff were above and beyond. They were relentless, encouraging me to move forward.

Thank all of you who assisted my daughter in rehabilitation after her brain injury. Her therapists kept her motivated and encouraged her daily.

I was treated with respect and dignity, and they paid attention to my physical and emotional needs as well.

Bless you for helping us and so many others to recover as much as possible from injuries and illnesses they have suffered.
